Work Experience

2019

Software Engineer, Uber Technologies Inc

Pittsburgh, PA, USA

- Worked on the maps team of the self-driving car division and focused on building geospatial web applications with React and in-house libraries, such as DeckGL and NebulaGL, to support geo-specialists in producing annotated maps for self-driving cars
- Organized brainstorm and code review sessions to encourage collaboration on improving existing features and optimizing map-making processes with automation
- Interfaced with production teams to ensure continuous delivery of new features and collect feedback for UX improvements

2018

Software Engineer Intern, Uber Technologies Inc

Pittsburgh, PA, USA

- Implemented web tools specialized in map making for geo-specialists, such as a street-level panorama panel using camera images taken by the in-vehicle cameras and a traffic light labelling tool to collect data for triangulation
- Created detailed documentation for the project to encourage future continuous development

2017

Frontend Developer Intern, Energo Labs

Shanghai, China

- Developed an online management portal using React for a peer-to-peer electricity exchange platform and built reusable UI components to visualize user data and monitor electric meter data
