Profile

Enthusiastic Software Engineer offering 1+ years in Full-Stack Development. Quickly learn and master new technologies and stay determined in the face of obstacles. Enjoy working in team settings and collaborating with people from diverse backgrounds.

Education

2020 — 2021	Imperial College London	London, UK
	Master of Science in Finance (Expecting)	
2017 — 2018	Cornell University	Ithaca, NY, USA
	Master of Engineering in Computer Science	
2013 — 2017	New York University Shanghai	Shanghai, China
	Bachelor of Science in Computer Science, Cum Laude	

Work Experience

2019 — Software Engineer, Uber Technologies Inc — Pittsburgh, PA, USA

- Focused on building a geospatial web application called Map Maker with React and Redux to support users in labeling maps and creating map features for self-driving cars
- Collaborated with cross-functional teams on developing a traffic light labeling tool that can triangulate the physical position of traffic light objects using camera images taken from multiple angles
- Built a verification panel to generate interactive error reminders during user editing and automatically run geometric tests to ensure accuracy when saving map features
- Developed a snapping algorithm to optimize user efficiency and conducted A/B experiments to see a reduction in production time of more than 50%

2018 — Software Engineer Intern, Uber Technologies Inc — Pittsburgh, PA, USA

- Implemented a panorama viewer with React and WebGL to stitch together camera images taken by the cameras of self-driving cars for users to gain a contextual understanding of the physical environment and facilitate the map-making process

2017 — Front-End Developer Intern, Energo Labs — Shanghai, China

- Developed reusable UI components to visualize transactions data with React for the online management portal of the company's peer-to-peer electricity exchange platform

Skills

Front-End Development: React, Redux, HTML, CSS, Sass, D3, WebGL
Back-End Development: Node.js, Express, MySQL, MongoDB
Data Science: PyTorch, Numpy, Pandas, Keras, Spark
Programming Languages: Python, JavaScript, Java

Projects

Available on [personal website](#)

Extracurriculars

Student Ambassador of New York University Study Abroad Program (2016)
